The latest campaign from the very effective GetUp! crew is on [transport and fuel prices](#):

Our leaders need to tackle climate change with real transport solutions. Instead they are arguing about rising petrol prices without addressing rising greenhouse pollution.

We're sick of waiting for the bus, train, tram or ferry while our politicians fail to solve these problems. It's time to inject some sanity into the debate.

Email your MP using our easy tool below and tell them to fix transport now.

GetUp! make it quick and easy to [send your thoughts to your MP](#) - they do listen to the messages they receive and the more they get, the more powerful the message.
