

South East Queensland's Transport System in the Peak Oil and Climate Change Era

Posted by [Phil Hart](#) on May 7, 2009 - 8:07am in [The Oil Drum: Australia/New Zealand](#)

Topic: [Policy/Politics](#)

Thanks to brisvegas for letting us know that Engineers Australia are hosting an event in Brisbane on 19 May:

South East Queensland's Transport System in the Peak Oil and Climate Change Era

<http://qld.engineersaustralia.org.au/jetspeed/static/events/10960/200905...>

The keynote speaker is Peter Newman and the venue has been organised specifically to maximise public attendance.

Here are some of the other topics and speakers:

- * Professor Peter Newman, Professor of Sustainability, Curtin University. Member of the Infrastructure Australia Advisory Council. Co-author of Resilient Cities: Responding to Peak Oil and Climate Change. Watch Professor Newman discussing peak oil here. A recent speech can be downloaded here.
- * Stuart McCarthy, ASPO-Australia. Watch Stuart speaking about the implications of peak oil for South East Queensland transport and infrastructure here.
- * Tristan Peach, Community Action for Sustainable Transport. Watch Tristan speaking about an alternative transport plan for Brisbane here.
- * Senior officials from Queensland Transport, Brisbane City Council and Queensland Rail.
