I'm still waiting to see the forthcoming [report on Australia's renewable energy future](#) from the Australian Academy of Science. In the meantime, I came across this [series of lectures](#), which the report will presumably be based on.

I'm still waiting to see the forthcoming [report on Australia's renewable energy future](#) from the Australian Academy of Science. In the meantime, I came across this [series of lectures](#), which the report will presumably be based on.

[Update: The report has now been released - <http://www.science.org.au/reports/documents/AusRenewableEnergyFuture.pdf>]

The series includes lectures on :

- * [The contribution of renewables in Australia's future energy mix](#)
- * [Tidal energy](#)
- * [Wind Energy: How it works and where is it going?](#)
- * [Solar thermal concentrators: Capturing the sun for large scale power generation and energy export](#)
- * [Bioenergy options for Australia](#)
- * [Fuel cells: A real option for base load electricity](#)
- * [Geothermal energy](#)
- * [Wave energy: The industry now and in the future](#)
- * [Solar photovoltaics: Power source for the future?](#)
- * [A low carbon economy based on renewable energy: The only way to go](#)

Cross posted from [Peak Energy](#).
